PERSONAL SUMMARY

Developer with +9 years of experience. I am eager for new experiences, a creative problem solver, and fast learner. When working, I value politeness, code quality, sense of humour, team-work, reliability, and proactivity.

I am happy to live in a time with great tools and frameworks to assist developers in building applications better and faster. I am looking for a suitable position in a established company. Somewhere to share and acquire new ideas, thoughts and abilities.

PROFESSIONAL CAREER

Front-end Developer

Pantaflix GmbH - Berlin (Mar 2017 - Sep 2018)

- Implemented a CMS tool for the customer care department using Vue.js, responsible for the set-up with Webpack and further development
- Responsible for the front-end on a CMS for filmmakers and consumers, using plain JavaScript and Twig
- Implemented new features on the main website, using jQuery and Node.js

Front-end Developer

Team2Venture GmbH - Berlin (Oct 2014 - Feb 2017)

- Participated in a CMS for external companies to handle freelancers and projects, using plain JavaScript and Scala templates
- Responsible for the development of a hybrid mobile app, using AngularJS
- Implemented new features on the main website, participating on a migration from Backbone and RequireJS to plain JavaScript and Browserify + Gulp

Full-stack Developer

Dreamsite - Madrid (Jun 2012 - Sep 2014)

- Developed +10 corporation websites using jQuery and PHP
- Integrated designs in Wordpress pages
- Managed and updated websites, applications and already implemented tools

Junior Full-stack Developer

Uniagro SL - Málaga (Jul 2009 - May 2012)

- Designed and developed +15 corporation websites using jQuery and PHP
- Designed logos and banners
- Managed and updated websites, applications and already implemented tools

EDUCATION

Senior Technician in Computer Applications Development (2007 - 2009)
IES Pedro Espinosa, Antequera, Málaga
