- WebStorm, Sublime Text, IntelliJ, Aptana; Filezilla
- Mac OS / Windows / GNU/Linux

EXTRA SKILLS / THOUGHTS

- The industry is continuously evolving, and we have to be willing to embrace new technologies. I am happy to live in times when we have lots of great tools to help us develop applications better and faster.

- In my third company, on my own initiative, I created a mobile hybrid app where clients and freelancers could interact, as well as check all the info related to the designated project.

- When responsive web design (RWD) came on the scene, I was excited about it. Due to that, I introduced this cool technique in the company in which I was working during my stay in Madrid; the customers responses were throughout positive.

- I am able to convert a design into a dynamic development recognizing of each pixel, which is thanked by the designers.

COURSES

- Photoshop CS5 | 80h | 2012
- Illustrator CS5 | 80h | 2012
- Technician in micro-computing tools | 534h | 2006
